THE HONG KONG POLYTECHNIC UNIVERSITY

AIH5571 Introduction to Generative AI and Its Applications (2026-2027)

Assignment 1 - Specification (v1.0)

Topic: Build Your Website (Introduce Yourself)

1. Overview & Background

Generative AI makes it possible to start with nothing and quickly build a complete website in a single working session. In this assignment, you'll create a one-page site to introduce yourself, with the help of AI. You'll also keep a record of the prompts you used and how you refined them.

2. Build the website

- Students submit one single-page website HTML file, with all CSS and JavaScript written inside that same file.
- If assets (e.g., images, audio, etc.) are used, please submit them together with the HTML file inside one .zip archive.

3. Submit Files

Item	Format
A. The website	index.html, or one .zip holding index.html and its assets
B. Prompt record	Export in markdown, docx or pdf

4. Assessment & Marks Allocation

Website Design (75%)

- Creativity, clarity, and aesthetics of the design
- Technical correctness (HTML, CSS, JavaScript all functioning within one file)
- Effective use of assets (if applicable)
- Overall presentation and usability

Prompt Record & Iterative Refinement (25%)

- Evidence of iterative improvement (how prompts were adjusted and refined)
- Reflection on the use of generative AI responsibly and effectively
